BUILDERS RESPONSIBILITIES FOR CONSTRUCTION WASTE

As a developer or general contractor, you have an obligation to keep your job site neat, clean and free of any construction waste.

The City of Newnan's Litter Ordinance clearly defines a person's responsibility to maintain sanitary conditions on their property and includes the following:

Litter must be placed into a receptacle or container installed on such property by the owner, agent or contractor in charge of said construction site.
[City Ordinance Sec. 17-85(b)]

There should be two waste receptacles on site; one for workers litter and another for construction waste. Each container should be a minimum of ten gallon capacity.
[City Ordinance Sec. 17-85(b)]

Vehicles used to haul any kind of dirt, rubbish, waste, etc. must be covered to prevent any part of its load from spilling or dropping at all times.
[City Ordinance Sec. 17-84]
